

# Base Station 915MHz High Gain Antenna

1. Mount antenna as high as possible, within reach of the LX Base Station.
2. Unscrew the antenna on the Base Station connector labeled 'WAN', and replace with the high gain antenna. Do not over-tighten.

## TIPS

- Do not install antenna next to metal objects like downpipes.
- Do not coil extra cable as a loop.
- Ideally, the antenna should be mounted as high as possible, away from any metal objects.
